PERSONAL PROJECTS

JukeBox (2020)

- Javascript jukebox is a mouse-driven, browser-based music player designed using HTML5 and Javascript. It was created specifically for Adam Jansch's sound art performance Human jukebox x n, and features functionality more associated with classic hardware jukeboxes.

Content Based Recommender System (2020)

- A content-based recommendation system recommends movies to a user by taking similarity of movies. This recommender system recommends a movie based on the movie description. It identifies the similarity between the movies based on its description. It also considers the user's previous movie history in order to recommend a similar movie.

Login/Sign-Up using Google O-auth (2021)

- A login/signup app that allows you to register using google account using passportjs by creating specific strategies and models using node js mongodb and express.
